

Never An Ordinary Experience

QUICK SHEET

In an industry becoming stagnant, Vantage LED is forging ahead providing revolutionary digital solutions with innovative hardware and intuitive software featuring professional content creation with internet & mobile access through the SM Infinity™ cloud-based platform; all backed by real human support, strong resources, and smart business.

INNOVATION

We don't build to match competition; we step ahead to be an active leader, partner, and innovator.

SM Infinity™: a collaboration with Spectacular Media to cultivate & include a cloud-based service to comprehensively control advertising on the LED sign from any Internet connected device (PC, Mac, Mobile or iPad App). Anytime. Anywhere. *...Along with integrated access to a team of professional designers standing by to create custom content specific for your client's LED sign.*
Automated Amber Alerts: Our LED displays can automatically show local and federal alerts from FEMA to help the community.

QUALITY

We go beyond the basics to ensure lifetime optimal system performance and stability.

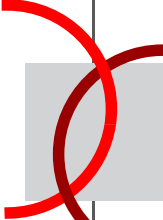

Darwin™ Solid State Industrial Control Unit
Handles the most demanding of graphics & video
Powered by Intel with an Open System for updates
No moving parts, faster data retrieval, & low heat

Conformal Coated Power Supplies
Designed for LED signage
Protected from condensation & oxidation
Increases life by 25%

Auto-Diagnostics w/Remote Reporting
A healthy sign means healthy business
Checks in on regular basis with diagnostic report
Proactive - Sign owner alerted immediately

CARE

We actively work to support dealer partner & their clients in as many ways as possible.

Strong Dealer Partner relationships

Clear & concise support documentation

1:1 direct remote support
(no mass webinars)

Lifetime support for the software & cloudware

Accessible U.S. Support System

GROWTH

We are a team of young and old, new and seasoned professionals sparking change in the industry.

Press Releases
Showcase your story or project
Increases visibility online & offline for Dealer Partners & End-Users

Co-Branded Marketing & Hardware
Strengthens the Dealer Partner relationship and gives pride to their business; ownership of the project.

Passionate Individuals
Actively educating dealer partners & end-users
Always listening, engaging and encouraging feedback
Strong teamwork mentality

FLEXIBILITY

VANTAGE FLEX: *Product Line and Business Terms*

We believe in flexibility for our client's product to grow and for our dealer partners business to grow.

FLEX Product Line: Our FLEX240 LED Module features all our pitches in one universal module size. Client can upgrade their display to a tighter pitch, or even from monochrome to full color, later as their organization grows.

FLEX Business Terms: By being flexible, we can tailor Terms up to 180 days, Deposits as low as 30%, Parts Warranty and Onsite Service up to 7 years, Guaranteed Lead Times as little as 2 weeks to help dealer partners with cash flow and manage their growth.

Why Vantage LED is Different from other Manufacturers.

FEATURES		
	VANTAGE	OTHERS
Cloudware vs. Software	<p>Online Anytime, Anywhere Access from any internet connected device. Content & Schedules stored securely online. Multiple Users. Seamless updates.</p>	<p>Local Strictly PC-Based & only one user. If the PC is damaged or the software is lost, the sign is not accessible.</p>
Terms & Deposit	<p>Great Flexible Terms Up to 180 day terms and as low as 30% deposit. Better cash flow options for dealers and help building credit for their business to grow as sales increase.</p>	<p>Limited Terms 50% deposit and (sometimes) 30 day terms. Very little flexibility with financing options and little-to-no assistance in building dealer's business as sales increase.</p>
Flexible, Future-Proofed System Build	<p>FLEX240 Future-Proofed A client can easily upgrade their Flex240 display from the pitch purchased to a tighter pitch later on.</p>	<p>Sale Is Final No option to change out modules and system components to a tighter pitch or newer technology.</p>
Versatile Control System	<p>Industrial PC (IPC) An Intel Based Industrial PC ensures content looks stunning on the display while allowing the end-user to upgrade the technology to include new options down the road.</p>	<p>Embedded Control Boards don't allow for easy upgrades or easy integration with new technology. Most systems cannot be upgraded, but will cost nearly 1/3 of the display's original price if available.</p>
Energy Efficiency	<p>Low Power Lower power doesn't just help the environment, it helps save money. Plus it provides clients the option to integrate solar technology.</p>	<p>Energy "Efficient" Even the most energy efficient systems still have a high cost to operate and can't easily integrate alternative power sources. Energy efficient isn't always a savings. Check the numbers!</p>
Strong Warranty	<p>Comprehensive Warranty Up to 7 years parts and on-site service, insured through a strong third party guarantor. The warranty and service is insured and covered regardless of the manufacturer's status.</p>	<p>Standard Warranty 5 years on parts with the option to have on-site service "promised" by the manufacturer. If the manufacturer goes out of business, the warranty is voided.</p>
Partnership	<p>Power of Partnership Co-branded marketing materials, website assets, collaboration on sales efforts, shared tradeshow booths, total partnership and support to grow dealer's business.</p>	<p>Just Another Vendor No cobranded marketing materials, no sharing on tradeshow costs, little-to-no collaboration to grow dealer's business. A vendor sells them product, but doesn't help them grow their business.</p>
